ANNUAL REPORT

of the

MEDICAL OFFICER OF HEALTH

for the Year 1973

TO THE CHAIRMAN AND MEMBERS OF THE CROMPTON URBAN DISTRICT COUNCIL

Mr. Chairman, Ladies and Gentlemen,

In the introductory letter to my Annual Report for 1972, I referred to the probability that, having regard to the timetable of Local Government and National Health Service Reorganisation, it was unlikely that a similar Report for 1973 could be presented to existing Authorities before this demise on 31st March, 1974. Much of the essential data normally presented in Annual Reports of the Medical Officer of Health and Chief Public Health Inspector is not available until the second quarter of the following year - for example population data supplied by the Registrar - General, or data collected locally from other agencies of Local Government.

Within the last few days however, the Chief Medical Officer of the Department of Health and Social Security has written to all Medical Officers of Health requesting that, wherever possible, Local Authority Health Departments should prepare an Annual Report, albeit abbreviated, for 1973, to ensure that it can be made available - updated if necessary - to successor Authorities. With the present pressure of work in Local Authority Health Departments it would in any case be impossible at present to prepare the report in its usual form. There is moreover the problem that it will be impossible to present this formally to Councils in the usual way.

In consultation with other officers in the Department, I am, therefore, arranging that this report will be based on the information available locally at 28th February, 1974, in the hope that it can be ready for duplication by about 11th March, and despatched about 15th March. I would hope that it can be formally accepted by those Councils meeting after that date, but members of Authorities will appreciate that there is no statutory need for them to formally approve or accept the report - the obligation is on the Medical Officer to present it.

In order to reduce the clerical workload we have attempted to prune comment drastically and to concentrate on presenting in tabular form such data as is available, on the assumption that this will be of most use as a matter of record and to those of you who will be serving as members of new Authorities - whether Metropolitan District Councils, Health Authorities or associated Advisory or Consultative Bodies. We have attempted where possible to give "estimated" figures based on local returns where corrected annual figures are not yet available, e.g. the Total Deaths by multiplying the deaths in the first eleven months of the year by 12/11.

We have had to eliminate completely certain sections where the available data is either so incomplete as to preclude "estimates", or where analysis of existing data would be so time-consuming as to delay our printing and distribution of the report.

I am acutely conscious that this report is thus, in many respects, a much less informative document than those of my predecessors, whose high standards I have endeavoured to maintain. Yet I am delighted at the belated recognition of their value as an irreplaceable source of local information; it is perhaps an indication that the planners and legislators for the Reorganised Local Government and Health Service have suddenly realised that Local Authority Health Departments were geared up to the publication of information that would not otherwise have been generally available.

In just four weeks time the honourable office of Medical Officer of Health will pass into history, the phoenix of "Community Physicians" rising from the ashes. It is not for me to forecast how effective the new systems of Health Care will eventually prove - I would only again ask that Members of Authorities, and the public, make reasonable allowance for those problems and confusion that may arise in the immediate future when those of us with any Administrative responsibilities are trying to get the new machinery into operation. I personally am proud to have held office as a Medical Officer of Health and Divisional Medical Officer and to have had the opportunity to serve in the National Health Service since its inception in 1948.

I am, Mr. Chairman, Ladies & Gentlemen,

Yours sincerely,

GILBERT R. BRACKENRIDGE

Medical Officer of Health

Public Health Department,
Town Hall,
SHAW.

1st March, 1974.

GENERAL STATISTICS

Area (Acres).....	2,865
Population - (a) Census 1971.....	17,020
(b) Registrar-General's (Mid-year 1973).... (Estimated)	17,500

PHYSICAL FEATURES AND GENERAL CHARACTERISTICS OF THE DISTRICT

The Urban District of Crompton covers some 2,865 acres located on the western slopes of the Pennines on the fringe of the South Lancashire Industrial Area, varying between 550 to 1,300 feet above sea level. It is bounded on the north by the Urban District of Milnrow, on the south and west by the Urban District of Royton, on the south by the County Borough of Oldham and on the east by the Urban District of Saddleworth in the West Riding of Yorkshire.

Much of the outlying area is comprised of agricultural and moor land. In spite of some contraction, textiles remains the chief industry. Other industries include electric lamp manufacture and light engineering.

The district is divided into four wards, North, South, East and West.

The sub-soil is chiefly clay and shale, with sand and rock in places overlying the coal measures.

The district is well served by transport facilities - rail and bus services.

PREVALENCE AND CONTROL OF INFECTIOUS DISEASES

List of diseases notifiable to the Medical Officer of Health -

Anthrax	Paratyphoid Fever
Cholera	Plague
Diphtheria	Polionyelitis (acute)
Dysentery	Relapsing Fever
Encephalitis (acute)	Scarlet Fever
Food Poisoning	Smallpox
Infective Jaundice	Tetanus
Leprosy	Tuberculosis
Leptospirosis	Typhoid Fever
Malaria	Typhus
Measles	Whooping Cough
Meningitis (acute)	Yellow Fever
Ophthalmia Neonatorum	

There was a decrease in the number of cases of infectious diseases notified, only 32 cases in 1973 as against 225 in 1972.

Tuberculosis.

Seven new cases of tuberculosis were notified in 1973, 6 pulmonary and 1 non-pulmonary. At the end of 1973 there were 19 persons on the Tuberculosis Register, 14 pulmonary and 5 non-pulmonary.

GENERAL PROVISION OF HEALTH AND ALLIED SERVICES IN THE DISTRICT.

During 1973 the following Local Health Authority Services, provided by the Lancashire County Council, were administered by Lancashire County Health Division No. 14.

(a) Local Authority Health and School Health Clinics

The temporary Clinic at the Congregational Church, Rochdale Road, was in use until the end of October, 1973.

From November, Local Authority Services were transferred to the new Health Centre in High Street, and the local General Practitioners also moved to the Health Centre in December. The Health Centre telephone is Shaw 42511.

(b) Health Visiting and School Nursing Service

These staff are based at the Clinic mentioned above

(c) District Nursing services

(d) Midwifery Service including Antenatal Clinics

(e) Vaccination and Immunisation Service

- available at the local Clinic or by arrangement with local General Practitioners

(f) Ambulance Service

Vehicles serving the district are based on the Middleton and Crompton Ambulance Stations and are under Radio Control from the Whitefield Ambulance Control Centre (Telephone 766 6666)

(g) Certain "Care and After Care" services including Chiropody, Cervical Cytology, Laundry and Incontinence Pad services.

The Lancashire Executive Council was responsible for General Practitioner, General Dental, Ophthalmic and Pharmaceutical Services provided under the N.H.S. Act.

There are no General Hospitals in the District, and the majority of residents requiring Hospital/Specialist services were admitted to the hospitals (Oldham and District General Hospital and Oldham Royal Infirmary) under control of the Oldham Hospital Management Committee. This hospital group had facilities for investigation/treatment of most groups of patients. Cases of Acute Infectious Disease are normally admitted to Monsall Hospital, Manchester. A proportion of residents are admitted to both General and Special Hospitals in Manchester.

Lancashire County Council Social Services Department were responsible during 1973 for the following services, which are locally administered by

the Divisional Director, Social Services Division 8, Prospect House, Main Road, Oldham.

- (a) Day Nursery Service
- (b) Registration of Child Minders and Playgroups
- (c) The Home Help Service
- (d) The Mental Health Service
- (e) Welfare of the Handicapped and Blind
- (f) Local Authority Services for the Elderly including
Residential Care
- (g) Convalescent Care
- (h) Children's Acts and related legislation

From 1st April, 1974, the Oldham Area Health Authority (main offices - St. Peter's House, Oldham) will assume responsibility for all existing Hospital Services; executive Council services (General Practitioners, Dentists, Chemists etc.); Clinic and Domiciliary personal Health services and School Health Services within the new Oldham Metropolitan District.

The Oldham Metropolitan District will have direct responsibility for the existing Environmental Health Services (including Communicable Disease Control, Housing Conditions, Clean Air, Refuse Collection, Food Hygiene) and also for Social Services within the Metropolitan District.

Generally speaking, therefore, from 1st April, 1974

- (a) The Public Health Inspectorate and allied staff will be employed in the Environmental Health Section of the Oldham Metropolitan District Council.
- (b) Present "Social Service" Department staff and establishments including Homes for Elderly, Day Nurseries, Adult Training Centres will pass to the control of the Social Services Committee of the Oldham Metropolitan District Council.
- (c) Medical, Dental, Nursing, Paramedical, Administrative and Clerical staff presently employed within County Health Division 14 will be employed by the new Oldham Area Health Authority.

ANNUAL REPORT
of the
SENIOR PUBLIC HEALTH INSPECTOR
for the Year 1973

TO THE CHAIRMAN AND MEMBERS OF THE CROMPTON URBAN DISTRICT COUNCIL

Mr. Chairman, Ladies and Gentlemen,

Although this Annual Report for 1973 is being presented in a different and very much shortened form from that of previous years, it should not be taken as an indication that the work of the Public Health Department diminished in any way during the year. On the contrary, a considerable amount of time, much of it outside normal working hours, was spent preparing for re-organisation and it is hoped that these efforts will not only help to produce a smooth change over but also a continuation of the previously attained standards of service, to the residents of Crompton.

Routine inspections of food premises, factories, offices and shops etc. were continued throughout the year and wherever possible, details of these inspections are provided in tabular form.

The refuse collection service operated fairly satisfactorily though once again, efforts to implement a Work-Studied Incentive Scheme proved abortive. On the instructions of the Health Committee, the Work Study Officer and myself looked into the possibility of using plastic bin liners inside the dustbins but estimated capital and running costs of the scheme precluded the Committee from going ahead. Perhaps this proved to be a blessing in disguise as, towards the end of the year, plastic sacks became extremely difficult to obtain and the cost rose by 150%. Refuse disposal continued at the Oldham Tip but the joint incinerator project had to be suspended for the time being and presumably will be looked at again by the Manchester County Council who will take over responsibility for refuse disposal after re-organisation.

The No. 6 (Cherry Hall/Fir Lane) Smoke Control Order came into operation on 1st July, 1973. On that date, 64% of the total area of the district and 54% of the total number of properties in the district were covered by smoke control orders.

Thirty-two new Council dwellings were completed during 1973 bringing the total of post-war Council dwellings erected to 732. Private development continued and during the year 99 houses were erected bringing the total of privately built post-war dwellings to 2,563.

For various reasons, the Council's programme for the improvement of the pre-war Council houses proceeded much more slowly than originally anticipated. As a result, throughout the year there were acute re-housing difficulties and again the Clearance programme had to be curtailed. Owners of private properties

continued to take advantage of the increased grant arrangements and 279 applications were received for Standard or Improvement grants.

This is the eleventh and final time that I have had the privilege of presenting an Annual Report to the Council. During my thirteen years of service in the Crompton Public Health Department I have enjoyed a happy relationship with Council members, Chief Officers and staff of other departments and particularly my own staff to whom I am very much indebted. I have many regrets that very shortly, some of these relationships will be coming to an end yet I am confident that the friendships I have made will continue and I look forward to taking up my appointment in the new authority which will still bring me into contact with the people of this district.

I am, Ladies and Gentlemen,

Yours sincerely,

A. RENSHAW

Senior Public Health Inspector

Public Health Department,
Town Hall,
SILW

1st March, 1974.
